Proposal for Lead Service Lines Replacement Program

Propose City provide Customers with Lead Service Lines Pipe and Parts for New Service Lines and waive or reduce Street Cut Permits.

City already provides Customers installing New Service Line with:

Service Saddle (Cost varies pending pipe size and material)

Estimated Cost \$ 150.00 - \$ 400.00

Corp Stop-\$ 125.00

Curb Stop-\$ 160.00

Curb Box-\$ 125.00

Propose City also offer to pay for 1 inch CTS Plastic Pipe at \$ 2.15 a ft.

(Example: a 60 ft Service line would cost \$ 129.00, a 100 ft line would cost \$215.00)

Propose City waive Street Cut Fees of \$600 Full Street Cut and \$300 Half Street Cut or Reduce fees by half. (Need to discuss this Topic)

Total Estimated Cost to City \$900.00 up to \$1,300 per Service Line.

If this is something the City would consider, then we would need to discuss the details.

Thanks,

Mike Johnson

Water Superintendent
City of Knoxville
